Raghuveer Aduri

Student

Highly skilled software development professional bringing enormous talents for software design, development and integration. Offering advanced knowledge of in-demand programming languages. Background writing code and developing systems for Industry applications.

Education

Expected in 2025-04

Integrated M.Tech: Software Engineering: Software Engineering

VIT Chennai - Chennai

- 9.12 GPA/CGPA
- Awarded with ₹1000 twice for higher GPA/CGPA.

2020-04

Intermediate Education

Tirumala Educational Institution - Andhra Pradesh

- Final Grade: 96.30%

2018-04

Higher Secondary Education

Sri Chaitanya Techno School - Eluru, India

- Final GPA: 9.8

Professional Experience

2024-03 - Current

Azure Cloud Services Course

Chennai

- Performing comprehensive training in Azure cloud concepts, encompassing core services, solutions, and management tools, as well as security, network security features, identity, governance, privacy, compliance capabilities, cost management.

2023-12 - 2024-02

Machine Learning Intern

Bharat Intern

- Utilized deep learning frameworks to develop high-performance neural networks for complex tasks.

Skills

Data Analytics

Machine Learning

Mobile App Development

- Leveraged ensemble methods for combining multiple weak learners into a single strong learner, leading to better predictive performance.
- Evaluated the performance of different algorithms on benchmark datasets, guiding informed decisions about algorithm selection for specific projects.
- Presented findings and recommendations to stakeholders through detailed reports and visualizations, driving data-driven decision making.
- Got almost 95% of accuracy.

Web application development

Expert Java Knowledge

Natural Language Processing

Chatbot Development

Database Management

English

Telugu

Spanish

Hindi

Certifications

2022-04	Technical Support Fundamentals, Google
2023-12	Python For Machine Learning & Data Science Masterclass, Udemy
2023-03	Data Structures and Algorithms, Geeks for Geeks
2023-12	Natural Language Processing in TensorFlow, Coursera

Positions Of Responsibility

Previous Member of **Health Club**

Major Projects

Legal Bharat GPT
Nov 2023 - Nov 2023
Bharat Legal GPT is a AI model tailored for the legal domain, empowering users with valuable legal resources and services.
https://legal-bharat-gpt.streamlit.app/

Sandbox Gaming Services
App Dec 2022 - Present
It's a game ecommerce android application where customers can buy digital keys of steam or Xbox games.
https://github.com/Raghuveeraduri/Sandbox

IoT Based Terrarium Ecosystem Control
Oct 2023 - Dec 2023
The IoT-Enabled Terrarium Ecosystem Control System is a project aimed at the way we manage and maintain terrarium environments for various species. This project leverages IoT devices, including heaters, coolers, and humidifiers, in conjunction with the powerful ESP32 microcontroller, to create a smart and dynamic terrarium control system.

Extra-Curricular Activities

Seminar Presenter - Encryption Algorithms:
Delivered an engaging seminar to fellow classmates on the intricate workings of encryption algorithms. Demonstrated a strong grasp of cryptographic principles and their practical applications in data security. Effectively communicated complex concepts, fostering a deeper understanding among peers.

Mini Marathon Participant (Sponsored by Pepsi):
Engaged in a 10-kilometer mini marathon sponsored by Pepsi, showcasing endurance and commitment to physical fitness. Demonstrated determination and perseverance, culminating in the achievement of a medal for successful completion.

Web Development Workshop Participant :
Actively participated in a comprehensive workshop focused on building real-time web applications. Acquired practical skills in HTML, Bootstrap, and database management, enhancing proficiency in modern web development technologies. Demonstrated a keen interest in advancing knowledge and expertise in the rapidly evolving field of web development, laying the foundation for future projects and collaborations.
